**Subject:** What a shame!

Dear Sir/Madam,

I was very disappointed to hear about a shame in which DOJ put itself by accepting settlement with Microsoft.

Microsoft predatory politics and practice greatly damaged the development and innovation in computing. If not for Microsoft we would have better and faster computers, friendlier operating systems and better software. By settlement US Department of Justice practically encourages Microsoft to continue its anti competitive practice and harm against consumers. Unfortunately instead of protecting consumers, DOJ decided to protect monopoly. Fortunately we can hope that 9 courageous states that disagreed with DOJ will continue efforts to bring Microsoft to Justice. I am proud that I live in one of these states.

Sincerely,

Sergei Ludanov
